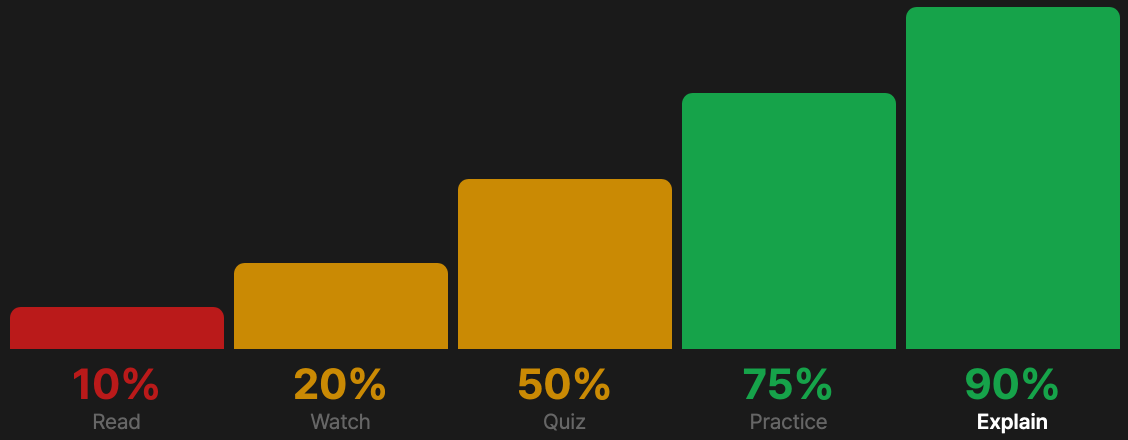
THE FORGETTING PROBLEM

You watched a 1-hour lecture yesterday. Today you can't explain a single concept.



"If you can't explain it simply, you don't understand it." — Feynman

Digest turns passive into active.

Paste any URL, YouTube, or PDF → 5 experiences that force your brain to **work**.

See it
Mindmap — structure at a glance

Dual Coding

Hear it
AI Podcast — 2 hosts debate it

Elaboration

Test it
10 MCQs — wrong = learn why

Active Recall

Remember it
Flashcards — before you forget

Spaced Rep.

Prove it — "Explain this concept."
AI Feynman tutor. Finds your gaps. Never gives the answer. Brain must sweat.

Desirable Difficulty

How it's built. How it heals itself.

📎 Any Source → 🧠 LLM Analyze → ⚡ ALL PARALLEL (Map | Quiz | Cards | Pod) → ✨ 5 Tabs Ready

🔨 oh-my-claudecode

- I wrote the spec (895 lines)
- Agent read it → built 4 rounds
- BE + FE, commits after each

🔄 Claude Agent SDK

- Test fails → Opus reads error + code
- Patches fix → retests automatically
- Playwright E2E + audio QA

GAN-inspired (Anthropic Harness Design): **Generator** → code / ← fix **Evaluator** → **Ship ✓** | 20+ commits, 0 manual code

THE VISION

The best lectures are already free. The missing piece is someone who asks "do you actually understand?"

A professor can't ask 300 students one by one.
AI can. Every student. Every concept. **Infinitely.**

Students
Lecture PDF → quiz → tutor
→ actually pass the exam

Engineers
Tech blog → mindmap → explain
→ teach your team

Everyone
YouTube → podcast → cards
→ actually remember it

From reading 10% → to explaining 90%. That's Digest.

See it. Test it. Prove it.

Paste anything. Understand everything.

🗺️ Map ❓ Quiz 🃏 Cards 🎙️ Podcast 🎓 "Explain it."
