You read a 30-page paper yesterday.
How much can you explain right now?

10%
retained from reading

90%
retained from explaining

"If you can't explain it simply, you don't understand it." — Richard Feynman

What Actually Makes Learning Stick

Passive
Read, watch, highlight
10% retained

→ THE GAP →

Active
Quiz, explain, recall
90% retained

👁️ **Dual Coding**
See it two ways:
visual + verbal

→

🧠 **Active Recall**
Output > input.
Brain must retrieve.

→

🔄 **Spaced Rep.**
Review before
you forget

→

💪 **Feynman**
"Explain it."
Brain must sweat.

A professor can't ask 300 students to explain one by one. AI can — every student, every concept, infinitely.

SOLUTION

Paste Anything. Understand Everything.

Paste URL → LLM analyzes → **See it** → **Test it** → **Prove it**

🗺️ Overview

Interactive mindmap. See the whole structure at once.

SEE IT — Dual Coding

❓ Quiz

10 MCQs. Wrong = explanation. Brain must output.

TEST IT — Active Recall

🃏 Cards

15 flashcards. Review right before you forget.

TEST IT — Spaced Repetition

🎙️ Podcast

2-host AI conversation. Learn on your commute.

SEE IT — Elaborative Interrogation

🎓 Tutor ★

"Explain this." Finds your gaps. Never gives the answer.

PROVE IT — Feynman Technique

💬 Chat

Ask anything about the source. Always there.

On-demand reinforcement

HOW IT'S BUILT

One LLM Call → Everything in Parallel

Any source → one analysis → all outputs simultaneously

① Source Input
URL, YouTube, PDF — any content type

↓

② LLM Analysis
Structured extraction: concepts, hierarchy, insights, analogies

↓

③ Parallel Generation

Mindmap | Quiz | Cards | Podcast

asyncio.gather() — all at once, not sequential

Stack

Frontend	**Next.js + Tailwind**
Backend	**FastAPI (async Python)**
AI	**LLM (text + TTS)**
Design	**Google Stitch**
Mindmap	**Markmap (interactive)**

Design: "Cognitive Sanctuary"

No borders. No clutter. Tonal depth instead of lines. A quiet space designed for thinking — not another generic AI dashboard.

RALPH

Spec → Agent → Ship

Human writes spec
SPEC.md (895 lines) + VERIFIED-API.md (504 lines) + 17 test scripts

→

Walk away
Ralph rule: don't touch the laptop

↓

GENERATOR-EVALUATOR LOOP (GAN-inspired, from Anthropic's Harness Design)

Generator
Agent writes code

code →
← errors

Evaluator
17 tests verify

→

Ship
All tests pass

↓

20+	5K+	0	4
commits	lines of code	manual code	verification stages

IMPACT

The Last Mile of Education

Access is solved.

MIT OpenCourseWare. YouTube. arXiv. The best lectures in history are **free**.

Understanding is not.

A professor can't ask every student *"explain it back to me."* There's 300 of them in the lecture hall.

AI can.
Every student. Every concept. Infinite patience.

Who Benefits

Students
Paste lecture PDF → quiz yourself → tutor catches gaps → actually pass the exam

Developers
Paste technical blog → mindmap architecture → quiz edge cases → explain to teammates

Lifelong Learners
Paste YouTube talk → podcast for commute → flashcards for spaced review

Educators
Generate quiz + cards from any material instantly. AI tutor handles 1-on-1.

See it. Test it. Prove it.

Reading 10% → Explaining 90%
