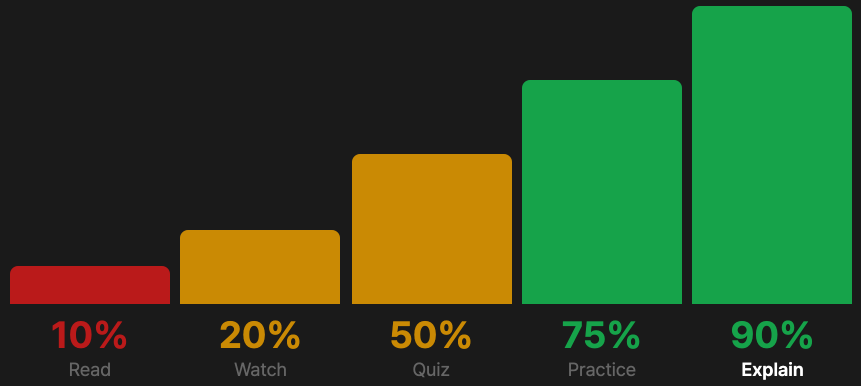
THE FORGETTING PROBLEM

Richard Feynman
Nobel Prize, 1965

"If you can't explain it simply, you don't understand it."



Access is solved. Understanding is not.
AI can ask every student: "explain it back."

Digest turns passive into active.

Paste any URL, YouTube, or PDF → 5 experiences that force your brain to **work**.

See it
Mindmap — structure at a glance

Dual Coding

Hear it
AI Podcast — 2 hosts debate it

Elaboration

Test it
10 MCQs — wrong = learn why

Active Recall

Remember it
Flashcards — before you forget

Spaced Rep.

Prove it — "Explain this concept."
AI Feynman tutor. Finds your gaps. Never gives the answer. Brain must sweat.

Desirable Difficulty

UNDER THE HOOD

One Source → Five Outputs → All Parallel

Blog URL | YouTube | PDF

↓

Gemini 3 Flash — Structured Analysis
Concepts, hierarchy, insights, analogies → context.json

↓

asyncio.gather() — ALL AT ONCE

Mindmap	Quiz	Cards	Podcast	Tutor
Gemini 3 Flash	Gemini 3 Flash	Gemini 3 Flash	Flash + TTS	Gemini 3 Flash

Frontend: Next.js + Tailwind **Backend:** FastAPI (async) **Design:** Google Stitch **TTS:** Gemini 2.5 Flash multi-speaker

RALPH PROCESS

Spec-First. Test-First. Then Walk Away.

WHAT I WROTE (before any code)

📋 **SPEC.md — 895 lines**
Every prompt, schema, endpoint, build order, design tokens

🧪 **VERIFIED-API.md — 504 lines**
Every LLM call tested and passing before build started

✅ **17 Test Scripts — 1,500+ lines**
API tests, Playwright browser E2E, audio quality checks

🎨 **Google Stitch Design System**
"Cognitive Sanctuary" — UI spec for the agent to follow

WHAT THE AGENT DID (autonomously)

1. Read spec → generated build plan
2. Built 4 rounds — BE + FE, commit after each
3. Ran verify scripts → fixed failures → retested
4. Shipped working app — 20+ commits, 5K+ lines

I wrote the blueprint. The agent built the house.

Ralph rule: don't touch the laptop while it works.

KILLER FEATURE

Claude Agent SDK — GAN-Inspired Self-Healing

From Anthropic's **Harness Design for Long-Running Apps** — separate builder from critic. Self-evaluation bias = code can't judge itself.

Generator
oh-my-claudecode
/autopilot builds code

→ code →
← errors ←

Discriminator
Claude Agent SDK
Opus 4.6 tests + fixes

→

Ship ✓
all tests pass

Auto-Fix Loop

Test fails → Opus reads error
+ source → patches → retests
Up to 5 cycles

Browser E2E

Playwright opens browser
clicks tabs, answers quiz
flips cards, sends chat

Audio Intelligence

LLM listens to podcast
verifies real speech
2 speakers, good quality

See it. Test it. Prove it.

Paste anything. Understand everything.

🗺️ Map ❓ Quiz 🃏 Cards 🎙️ Podcast 🎓 "Explain it."
